Subject Index

Accessory pathways
localization of, 95
MAPLES system in, S118
phase 3 and phase block in Wolff-Parkinson-White syndrome, 77
Action potentials
slow response reoxygenation affecting, 192
Activation–repolarization interval
determination with automated approach, 273
α-Adrenoceptor stimulation
and norepinephrine action on sinus node, 213
Angina
of effort, and R-wave increase from conduction delay, 39
and ST-segment fluctuations during exercise, 147
Angioplasty, coronary
false-positive posterior infarct criteria in, S105
in left anterior descending artery, and QRS changes in acute ischemia, S18
ST-segment recovery after, S27
Aortic valve disease
and ST-segment relation to heart rate, 31
Arrhythmias. *See also* Fibrillation; Tachycardia
CALVIN detector performance in noise, S117
computer-based generator of, S122
detection with new computer system, S129
experimental preparation of, S61
in hypertension, 183
reperfusion, intracellular sodium affecting, 199
and short repolarization properties, 345
stress tests with bipolar esophageal ECG, 94
transesophageal pacing to evaluate therapy in, 95
Atrial dissociation. *See* Dissociation, atrial
Atrial fibrillation. *See* Fibrillation, atrial
Atrioventricular block
in hypertension, 183
idioventricular rhythm in, during exercise, 289
Atrioventricular node
dual-pathway conduction pattern, 83
dynamic anisotropy of conduction in, 94
electrophysiologic changes in pathogenesis of atrial fibrillation, 89
histological studies at autopsy, 96
localization of accessory pathways in, 95, S118
Atrium
left, hypertrophy of, left ventricular diastolic properties in, S89
right, programmed stimulation in aberrant conduction, 90
transesophageal stimulation of, 91

Bazett formula
for QT interval measurements, 219
Body surface maps
in anterior non-Q infarction
abnormal Q waves in, 313
diagnostic value of, 321
based on transfer coefficient unification method, 90
discriminant patterns in anterior and inferior infarction, 93
limited lead system in infarction diagnosis, S193
in myocardial ischemic site identification, S158
in newborn infants, 15
PR segment in, 92
and precordial QRS transition zone variations, 25
and prediction of ventricular outline, S56
respiration affecting, 263
stress studies in myocardial ischemia, 91
variability ranges in normal subjects, 1
in ventricular premature beats, 137
in young men, 121
Bundle branch block, right
artificial, in ventricular tachycardia treatment, 93
after coronary artery bypass grafting, 91

Note: Articles on a page number preceded by the letter S were published in the 1988 supplemental issue.

Calcium
extracellular changes in depolarized tissue under suction electrode, 96
and slow response action potential changes in hypoxia, 192
CALVIN arrhythmia detector
performance in noise, S117
Cardiomegaly
experimental, postnatal ECG in, 96
Cardiomyopathy, hypertrophic
electrocardiography in, 93
septal, and sudden infant death syndrome, 97
CAVIAR
serial ECG processing system, S173
repolarization phase changes in, S177
Children
body surface maps in infants, 15
normal left ventricular mass and cavity size determinations, 231
sudden infant death in septal hypertrophic cardiomyopathy, 97
Collateral circulation
assessment with ST-segment changes, 55
Computer use
as arrhythmia generator, S122
in atrioventricular nodal function studies, 94
in bedside comparison of ECGs, S159
calculation of ST/HR slope, S134
CALVIN arrhythmia detector performance in noise, S117
CAVIAR serial ECG processing system, S173, S177
compared to manual ST-segment measurements, S130
comparison of XYZ leads and Marquette 12 standard-lead algorithms, S88
diagnostic system for ventricular and supraventricular arrhythmias, S129
in deriving 12-lead ECG from four EASI electrodes, S182
GALEN expert system language in, S81
in high-resolution ECG on standard ECG cart, S74
MAPLES system to localized accessory pathways, S118
microcomputer system for ECG mapping, 92
in model of electrogram, S69
on-line ECG format in emergency rooms, S11
and problems with cubic spline technique in exercise ECGs, S149
program performances in CSE data analysis in Japan, S169
real-time data-logger system in, S141
signal averaging causing pseudopositive exercise tests, S140
in simulation of electrical and magnetic heart fields, 89
survey of ECG analysis systems in U.S., S98
Conduction
delay in, and R-wave increase in effort angina, 39
intraventricular disturbances, new aspects of, 90
Contraction kinetics of heart
electromagnetic field of, 93
Coronary artery disease
angioplasty in. *See* Angioplasty, coronary
bypass grafting in, right bundle branch block after, 91
comparison of exercise precordial mapping and thallium scintigraphy in, 96
ischemic site identification in, S158
stress body surface mapping in, 91
and lead V_5 in ST-segment monitoring during occlusion, S30
noninvasive predictors of sudden death in, S36
predictive instrument for acute ischemic disease, S11
QRS-T angle in, 92
R wave increase in, S139
Cubic spline technique
in exercise ECG testing, S149

Data-logger system, real-time
in exercise ECG testing, S141
DC-coupled unipolar electrograms
activation–repolarization interval in, 273
Death, sudden. *See* Sudden death
Diagnostic alogorithms in ECG
significant differences in, S188
Dipolar electrocardiotopography
Analyzing and presenting signals, 96
Dissociation, atrial
history, 101
in brain tumor patient, 103
false, diaphragmatic origin of, 111
in myocardial infarction with AV block, 106

EASI lead system
to obtain 12-lead ECGs, S182
Echocardiography
comparison of computerized programs in, S88
correlation with ECG in normal children, 231
of left atrial size in atrial fibrillation, 247
Doppler studies of left ventricular diastolic properties in left atrial enlargement, S89

Ectopy, ventricular
in hypertension, 183
Electrical and magnetic heart fields
computer simulation of, 89
Electrocardiology
30-year perspective on, S1
Electrocardiotopography
dipolar, 96
Electrograms
computer model of, S69
in fibrillation identification, S121
in ventricular tachycardia, S120
Electrophysiologic studies
of changes in AV system in atrial fibrillation pathogenesis, 89
in intraventricular conduction disturbances, 90
in ventricular tachyarrhythmias, S64
Emergency rooms
on-line ECG format as predictive instrument in, S11
Emphysema, pulmonary
and QRS infarct size score, S112
Esophageal ECG
bipolar, in stress tests, 94
Exercise ECG
bipolar esophageal ECG in arrhythmias, 94
compared to exercise thallium scintigraphy in coronary artery disease, 96
cubic spline technique in, S149
and idioventricular rhythm in complete AV block, 289
manual and computer ST-segment measurements in, S130
optical disk-based database in, S141
pseudopositive tests from computer signal averaging, S140
Q-wave changes in, 45
and R-wave increase from conduction delay, 39
ST-segment fluctuation in, 147

Fibrillation
atrial
fibrillatory wave amplitude in, 247
intracardiac electrograms in, S121
paroxysmal, pathogenesis of, 89
ventricular
Fourier analysis of, and synchronized defibrillator shocks, 337
intracardiac electrograms in, S121
and late potentials in myocardial infarction, 283
Fractal dynamics
in analysis of Holter monitoring, S68
Fractionated electrograms
computer model of, S69
Fridericia's formula
for QT interval measurements, 219
Frontal-plane QRS axis
affected by left ventricular false tendons, 89
in right ventricular hypertrophy, 369

GALEN expert system language
development of, S81

Heart rate
computer-based calculation of ST/HR slope, S134
relation to ST-segment in aortic valve disease, 31
variability of, and sudden death, S46
High-resolution ECG
on standard ECG cart, S74
His–Purkinje potentials
distribution on body surface, 92
surface-recorded activity, 65
transesophageal recording of, 91
Holter monitoring
lead V_5 for ST measurements in coronary occlusion, S30
nonlinear dynamics in analysis of, S68
retrospective analysis of data in, S119
tape recording and playback for ST-segment analysis in, S20
Hypertension
arrhythmias in, 183
and T wave of magnetocardiogram, 174
Hypertrophic cardiomyopathy
electrocardiography in, 93
septal, and sudden infant death syndrome, 97
Hypertrophy
left atrial, and diastolic properties in left ventricle, S89
left ventricular
comparison of computerized ECG programs in, S88
vectorcardiography in, 90
right ventricular
frontal-plane QRS axis in, 369
vectorcardiography in, 90
Hypoxia
and reoxygenation affecting slow response action potentials, 192

Idioventricular rhythm
in exercise in complete AV block, 289
Infants
body surface maps in, 15
sudden death syndrome in septal hypertrophic cardiomyopathy, 97
Infarction, myocardial
anterior
body surface mapping in, 93
precordial QRS voltage in, 303
anterior non-Q
and Q waves in body surface mapping, 313
value of body surface maps in, 321
and atrial dissociation with AV block, 106
chronic canine model of, S64
criteria for healed infarct diagnosis, S93
emphysema affecting QRS infarct size score in, S112
inferior
body surface mapping in, 93
R/Q ratio in, 293
late potentials in, 283
limited lead set mapping in, S193
microcomputer system for ECG mapping analysis in, 92
nondipolarity estimation in, 91
pathologic and ECG findings in, 331
posterior, and false-positive criteria during coronary angioplasty, S105
prehospital treatment and ECG diagnosis of, S10
and QRST integral maps to detect susceptibility to malignant arrhythmias, 89
right ventricular, massive ST-segment elevation in, 115
and signal-averaged ECG in ventricular tachycardia, S40
single ECG lead for serial monitoring in, 253
thrombolytic therapy in, ECG criteria for, 95
International Society for Computerized Electrocardiography
progress report, S194
Interpretation systems for ECGs
three stand-alone systems compared, S163
Intravascular recording
in false atrial dissociation, 111

Late potentials, ventricular
in myocardial infarction, 283
time–frequency analysis of, S80

Magnetic and electric heart fields
computer simulation of, 89
Magnetocardiography
clinical application of, 90
heart contraction kinetics in, 93
P wave in, 161
in right ventricular overloading, 168
T wave in essential hypertension, 174
translation of data in anatomic terms, 94
MAPLES system
in localization of accessory pathways, S118
Marquette CASE 12 system
computer-based ST/HR slope calculation in, S134
Marquette 12 standard-lead algorithms
compared to Mayo XYZ leads, S88
Mayo XYZ leads
compared to Marquette 12 standard-lead algorithms, S88

Nelson lead system
in experimental cardiomegaly, 96
Newborn
body surface maps of, 15
Nondipolarity estimation
in myocardial infarction, 91
Nonlinear dynamics
in analysis of Holter monitoring, S68
Norepinephrine
action on sinus node, 213

Orthogonal ECG signals
analysis with dipolar electrocardiotopography, 96

P wave
in magnetocardiogram, 161
Pacemaker use
and computerized analysis of ECG patterns, 94
Paramedic systems
in prehospital treatment and ECG diagnosis of infarction, S10
Pirmenol
affecting sinoatrial node cells, 355
Potassium
and bidirectional tachycardia in hypokalemic periodic paralysis, 71
extracellular changes in depolarized tissue under suction electrode, 96
PR segment
body surface mapping of, 92

Premature beats, ventricular
sites of origin of, 137
Purkinje fibers
early reperfusion arrhythmias in, 199

Q waves
in body surface mapping in infarction, 313
exercise-induced changes in, 45
QRS complex
changes in acute ischemia, S18
frontal-plane axis
affected by left ventricular false tendons, 89
in right ventricular hypertrophy, 369
morphology during sinus rhythm and in ventricular tachycardia, 377
precordial voltage in anterior infarction, 303
score for infarct size, emphysema affecting, S112
transition zone variations, 25
QRS-T
angle in coronary artery disease, 92
integral maps of, nondipolar content as marker of susceptibility to malignant arrhythmias, 89
QT interval
relation to RR interval, 219

R wave increase
from conduction delay in effort angina, 39
in coronary artery disease, S139
Reperfusion arrhythmias
intracellular sodium affecting, 199
Repolarization
abnormalities in diagnosis of healed infarction, S93
activation–repolarization interval determination with automated approach, 273
localized shortening of, and arrhythmia vulnerability, 345
serial changes in, S177
Respiration
affecting body surface mapping, 263
R/Q ratio
in phases of inferior infarction, 293
RR interval
relation to QT interval, 219

Serial ECGs
bedside comparison of, S159
CAVIAR system for processing of, S173
changes of repolarization phase in, S177
and single lead in infarction, 253
Signal-averaged ECGs
late potentials in, in infarction, 283
in postinfarction ventricular tachycardia, S40
and pseudopositive exercise tests from computerized processing, S140
Sinoatrial node
norepinephrine affecting, 213
pirmenol affecting, 355
Sinus rhythm
fractal variations in, S68
Slow response action potentials
reoxygenation affecting, 192
Sodium
intracellular, and reperfusion arrhythmias, 199
and slow response action potential changes in hypoxia, 192
ST-segment
analysis with magnetic tape recording and playback, S20
in assessment of collateral development, 55
computer-based ST/HR slope calculation, S134
depression in coronary artery disease, S158
fluctuation during exercise in angina, 147
manual and computer measurements during exercise, S130
massive elevation in right ventricular infarction, 115
monitoring with lead V_5 in coronary occlusion, S30
recovery after angioplasty, S27
relation to heart rate in aortic valve disease, 31
in serial monitoring of infarction with single ECG lead, 253
Stand-alone ECG interpretation systems
comparison of, S163
Stress tests. *See* Exercise ECG
Suction electrodes
ionic activities under, 96
Sudden death
ECG predictors of, S35
and heart rate variability, S46
noninvasive predictors in coronary artery disease, S36
Sudden infant death syndrome
in septal hypertrophic cardiomyopathy, 97
Surface-averaged ECG
of His–Purkinje activity, 65

T wave
in arrhythmogenic right ventricular dysplasia, 239
of magnetocardiogram in hypertension, 174

Tachycardia
atrioventricular nodal reentrant, from verapamil, 83
bidirectional, in hypokalemic periodic paralysis, 71
ECG changes in posttachycardia syndrome, 95
ventricular
catheter ablation of right bundle branch in, 93
in chronic canine infarct model, S64
intraventricular electrograms in, S120
and late potentials in myocardial infarction, 283
localization of origin of, 95
postinfarction, signal-averaged ECG in, S40
and similar QRS complex morphology during sinus rhythm, 377
Tape recording and playback
for ST-segment analysis, S20
Telephonic transmission
of 12-lead standard ECGs, 92
Thallium scintigraphy
compared to exercise precordial mapping in coronary artery disease, 96
Three-dimensional displays
computer-generated, of activation–repolarization intervals, 273
Thrombolytic therapy
in infarction, ECG criteria for, 95
in prehospital paramedic care, S10
Transesophageal pacing
in evaluation of antiarrhythmic therapy, 95
for His potential recording, 91

U wave
inversion in coronary artery disease, S158

Vectorcardiography
in septal hypertrophic cardiomyopathy, 97
synthesis from 12-lead ECG, 361
of T wave changes in arrhythmogenic right ventricular dysplasia, 239
transformation coefficients for two-lead systems in, 97
in ventricular hypertrophy diagnosis, 90
Ventricles
left
comparison of computerized ECG programs in hypertrophy, S88
diastolic properties in left atrial enlargement, S89
false tendons affecting frontal QRS axis, 89
function studies after anterior infarction, 303
mass and cavity size determinations in normal children, 231
vectorcardiography in hypertrophy diagnosis, 90
right
arrhythmogenic dysplasia of, T wave modifications in, 239
frontal-plane QRS axis in hypertrophy, 369
overloading detection with isomagnetic maps, 168
vectorcardiography in hypertrophy diagnosis, 90
volume variations affecting ECG, 154
Ventricular ectopy
in hypertension, 183
Ventricular premature beats
sites of origin of, 137
Ventriculograms
right oblique, correlation with body surface maps, S56
Verapamil
atrioventricular nodal reentrant tachycardia from, 83

Waveforms, cardiac
adaptive sampling of, S57
Wolff–Parkinson–White syndrome
and phase 3 and phase 4 block in accessory pathway, 77
